Who are we?

ND ASSISTIVE, a 501(c)3 non-profit, connects people of all ages and abilities to Assistive Technology (AT) devices and services to help them learn in school, work, access the community, and live safely and more independently in the home of their choice.

Since 1993, ND ASSISTIVE has been one of the 56 AT Act programs in the United States, providing a range of AT-related services to increase awareness of and access to assistive technology for people in North Dakota and Northwest Minnesota. In addition, ND ASSISTIVE administers several other state and federal contracts and delivers AT services on a fee-for-service basis.

What do we do?

We have two Demonstration Centers in Bismarck and Fargo where people can learn how assistive technology can help children in schools, people who want to work/continue working, those who want to be independent out in the community, and those who want to stay in their homes longer as they age versus having to move to a more restrictive environment such as a nursing home.

ND ASSISTIVE consultants are available to assess needs and recommend AT solutions for children in schools, transition-aged youths, people who want to work or continue working, and anyone who wants to be independent. We offer short-term equipment loans, so people can try them before they buy. We also aid with finding funding to help get the AT devices into the hands of the people who need them.

How do we do this?

- **Assistive Technology Equipment Demonstrations**
 - Free meeting with an AT expert to figure out solutions in our center or via video conferencing
 - Explore our Demonstration Centers in Bismarck and Fargo
 - Call to schedule an appointment
